Course summary

For a limited time only, On Demand is available at no cost. Three month promotion ending July 31, 2025.

This course is designed for both new Elasticsearch users and Elasticsearch professionals. It begins with the basics for getting started with the Elastic Stack, then quickly dives deep into topics for building efficient clusters. You will learn how to write search requests and work with their responses, transform and enrich data, implement strategies to optimize and scale your clusters, create data lifecycle and backup policies, manage multi-cluster operations, and troubleshoot your cluster. After completing this course, you will be well on your way to becoming an **Elastic Certified Engineer**.
